

Protect Mother Earth Project

SAVE MOTHER EARTH WITH YOUR LITTLE EFFORT

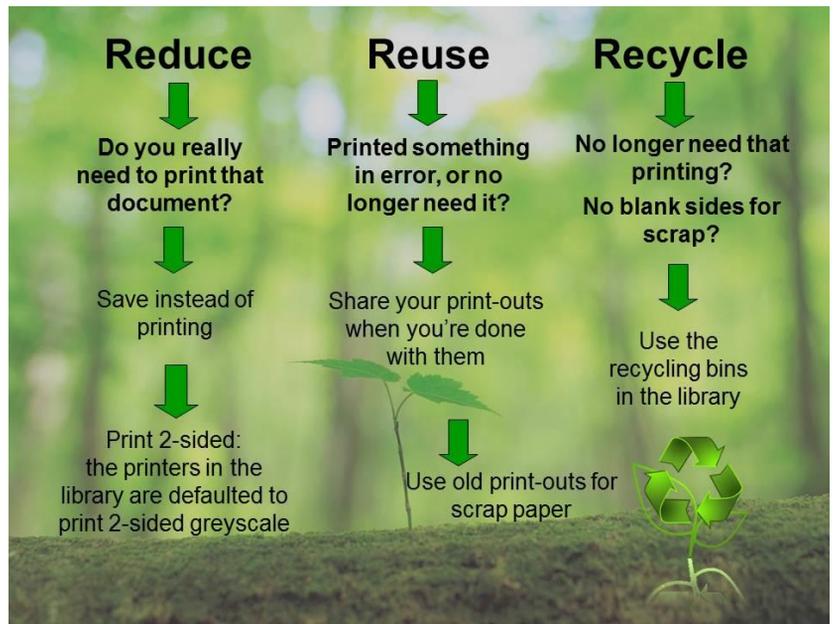

What is Global Warming?

Global warming is the gradual heating of Earth's surface, oceans and atmosphere. Scientists have documented the rise in average temperatures worldwide since the late 1800s. Earth's average temperature has risen by 1.4 degrees Fahrenheit (0.8 degrees Celsius) over the past century, according to the Environmental Protection Agency (EPA). Temperatures are projected to rise another 2 to 11.5 degrees F (1.133 to 6.42 degrees C) over the next 100 years.

10 points

Reduce, Reuse, Recycle

Do your part to reduce waste by choosing reusable products instead of disposables - get a [reusable water bottle](#), for example. Buying products with minimal packaging (including the economy size when that makes sense for you) will help to reduce waste. And whenever you can, recycle [paper](#), [plastic](#), newspaper, glass and [aluminum cans](#). If there isn't a [recycling program](#) at your workplace, school, or in your community, ask about starting one. By recycling half of your household waste, you can save 2,400 pounds of carbon dioxide annually.

Protect Mother Earth Project

Use Less Heat and Air Conditioning

Adding insulation to your walls and attic, and installing weather stripping or caulking around doors and windows can lower your heating costs more than 25 percent, by reducing the amount of energy you need to heat and cool your home.

Turn down the heat while you're sleeping at night or away during the day, and keep temperatures moderate at all times. Setting your thermostat just 2 degrees lower in winter and higher in summer could save about 2,000 pounds of [carbon dioxide](#) each year.

Protect Mother Earth Project

Change a Light Bulb

Wherever practical, replace regular light bulbs with compact fluorescent light (CFL) or [LED bulbs](#). Replacing just one 60-watt incandescent light bulb with a LED used 4 hrs a day can yield \$14 in savings annually. CFLs and LEDs will also last many times longer than incandescent bulbs.

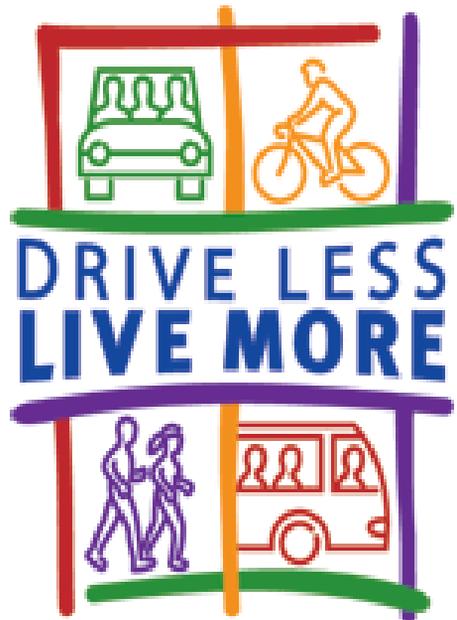

Protect Mother Earth Project

Drive Less and Drive Smart

Less driving means fewer emissions. Besides saving gasoline, walking and biking are great forms of exercise. Explore your community mass transit system, and check out options for carpooling to work or school.

Protect Mother Earth Project

Buy Energy-Efficient Products

When it's time to buy a new car,
choose one that offers [good gas mileage](#).

Home appliances now come in a range of energy-efficient models,
and LED bulbs are designed to provide more natural-looking light while
using far less energy than standard light bulbs....
